EDUCATION

BACHELOR'S IN COMPUTER SCIENCE

KROK University

2019 - 2023

MASTER'S IN MANAGEMENT (AGILE SOFTWARE DEVELOPMENT)

KROK University

2023 - 2025

SUMMARY

Seeking a position where I can utilize my skills in backend development and automation while remaining resourceful, flexible, and eager to learn.

EXPERIENCE

SOFTWARE DEVELOPER

"STARLINK-GROUP" LLC

2023 - Present

- Implemented a full-scale API integration with 'Nova Poshta' services within the 1C ERP environment, automating label generation and shipping logistics.
- Re-architected data synchronization between databases, replacing a 2-hour scheduled interval with a real-time event-driven model to eliminate data latency and optimize server load.
- Automated high-volume sales document generation within the ERP system, eliminating manual processing bottlenecks for cross-functional teams.

SECURITY ADMINISTRATOR

OTETO VPN

2021 - 2023

- Automated server security configuration using Bash scripts (SSH, firewall, Fail2Ban, access permissions, etc.), which reduces configuration time from hours to minutes.

DATABASE DEVELOPER

TimeSoft

2020 - 2021

- Co-designed PostgreSQL database schemas and optimized SQL queries to implement user authentication, authorization, and robust activity logging.
